

## STATEMENT OF PURPOSE

My interest in nursing date back when I was young, since childhood I was captivated by the practice of nursing. I think of the greatest accomplishments of becoming a professional nurse is the satisfaction that comes with it. As a single mother with three children, I have had heavy family responsibilities. I have kept my family going for many years; I performed the roles of caring, loving and giving attention to the children whole heartedly. My children solely depended on me for financial support and relied on my advice.

Intellectual and clinical interests are due to my passion for nursing. I earned my degree in nursing, in 2003, to date I have over 10 years experience in nursing in ICU. I believe I posses all the qualities to make successful Family Nurse Practioner. I hope my education and professional experience will grant me the opportunity to fulfill my dreams.

Georgetown University is my first choice to study because of the progressive aspects of your curriculum in diversity and humanity of a different culture, faith and beliefs. Developing further through nursing program at Georgetown University School of Nursing & Health Studies will pave my way to attaining my dreams of attaining greater depth in knowledge in becoming a family nurse Practioner. In addition, am excited about the possibilities of advancing my career through the performance of

specialized duties required to care for the aged and critically ill patients.

I anticipate the family nursing program that is challenging, and I think that my experience as a nurse will be of much help in my academics. I thrive under pressure, consistently demonstrating my ability to keep my mind focused. Above all, I feel honored seeing a patient get better through my help. The nursing profession brings me the greatest level of personal, spiritual and professional satisfaction that I would ever desire.
